Powering Digital Futures with Intelligence & Innovation.

Who We Are ?

Your Partner in Digital Transformation & Innovation | with 100+ inhouse technology professionals

Established in 2006, we are a forward-thinking digital transformation partner delivering end-to-end solutions from strategic planning to seamless implementation and continuous optimization. With a strong foundation in emerging technologies such as **AI, Cloud Computing, IoT, and advanced data analytics**, we empower businesses to accelerate growth and maintain a competitive edge.

We Empower Organizations **Transform, Create Value, Grow, and Develop Sustainable Competencies** to face tomorrow's challenges, and we empower them with top-tier expertise across the Middle East and Africa.

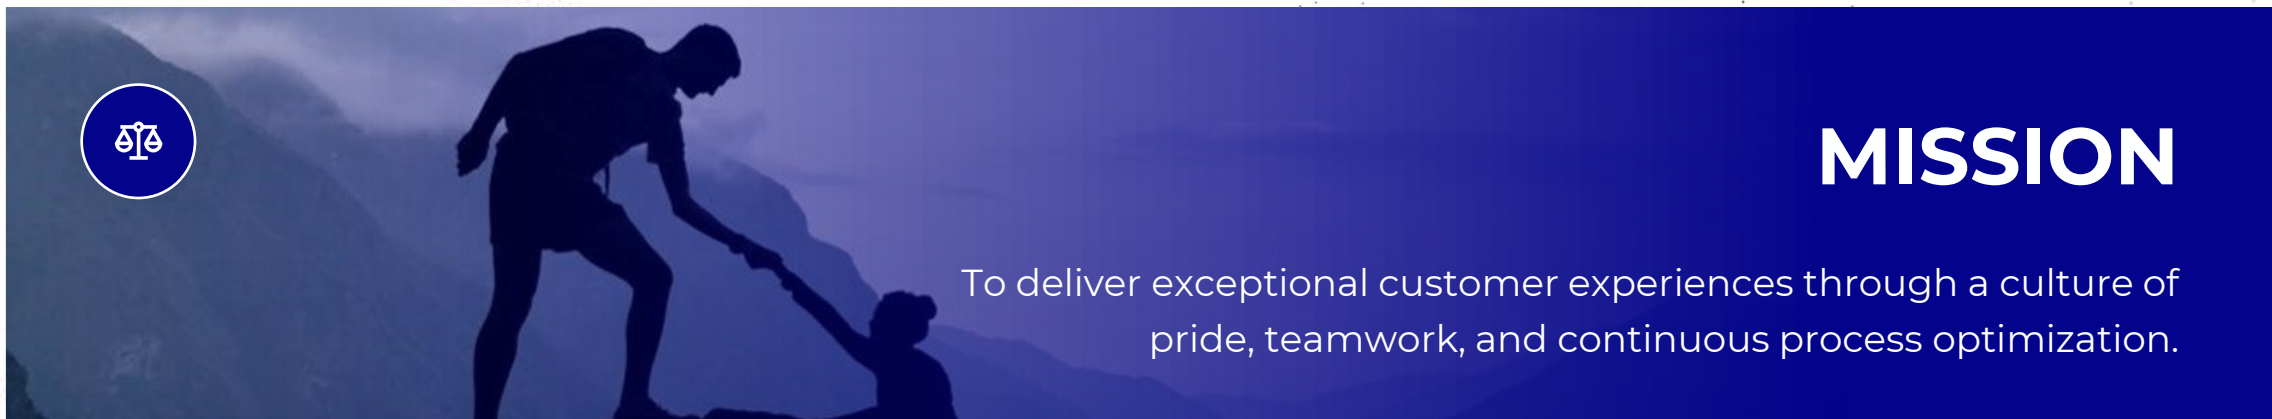

VISION

To be a leading force in delivering innovative solutions, superior products, and exceptional services that empower digital transformation and national progress.

MISSION

To deliver exceptional customer experiences through a culture of pride, teamwork, and continuous process optimization.

Our Methodology

Built for continuity, improvement, and lasting transformation.

Through collaborative engagement, strategic insight, and a continuous improvement mindset, we guide organizations through every phase of digital transformation. Our approach emphasizes adaptability, impact, and long-term value empowering clients to lead confidently in a digitally evolving world.

Our **EVOLVE** framework is a structured, practical model that supports organizations from vision to execution and beyond. Designed to align with industry best practices and national strategies, **EVOLVE** ensures measurable outcomes, operational efficiency, and sustained innovation.

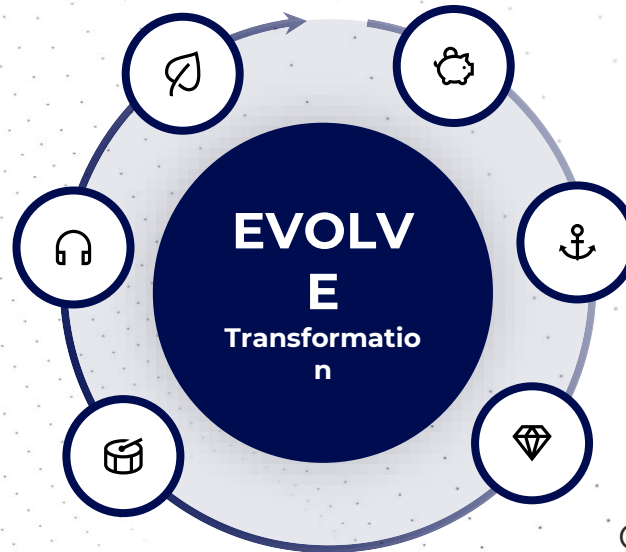

Transformation Framework Variants

Our Approach is rooted in a comprehensive understanding of industry specific dynamics, regulations and best practices.

EVOLVE Citizen

&

Core Business & Services

Drive Digital Transformation: Powering Intelligent Infrastructure with Data and AI

Strategic advisory, robust cybersecurity, and smart city solutions for a connected future

Consulting & Digital Transformation

Providing end-to-end advisory and implementation services to drive organizational modernization, improve efficiency, and align with national digital strategies.

Data Management & Artificial Intelligence

Delivering advanced data governance, analytics, and AI-powered solutions to unlock insights, automate processes, and enhance decision-making.

Cybersecurity Solutions

Ensuring secure, compliant, and resilient digital environments through robust cybersecurity frameworks, risk assessments, and protection strategies.

Smart Cities & Intelligent Building Systems

Designing and implementing smart infrastructure, integrated building technologies, and urban solutions that enable efficient, connected, and sustainable living.

We Offer

Comprehensive Digital Transformation Solutions

Digital Transformation Consulting
Strategic advisory for
organizational modernization.

Cloud & Infrastructure Services
Modernizing IT foundations for
scalability and agility.

Process Automation (RPA)
Streamlining operations
through intelligent
automation.

**Driving innovation and
efficiency across all sectors.**

Managed Services & Support
Providing continuous
optimization and post-
implementation support.

National Digital Strategies
Aligning solutions with national
development visions.

Data & AI Management
Unlocking insights and
automating processes with
advanced analytics.

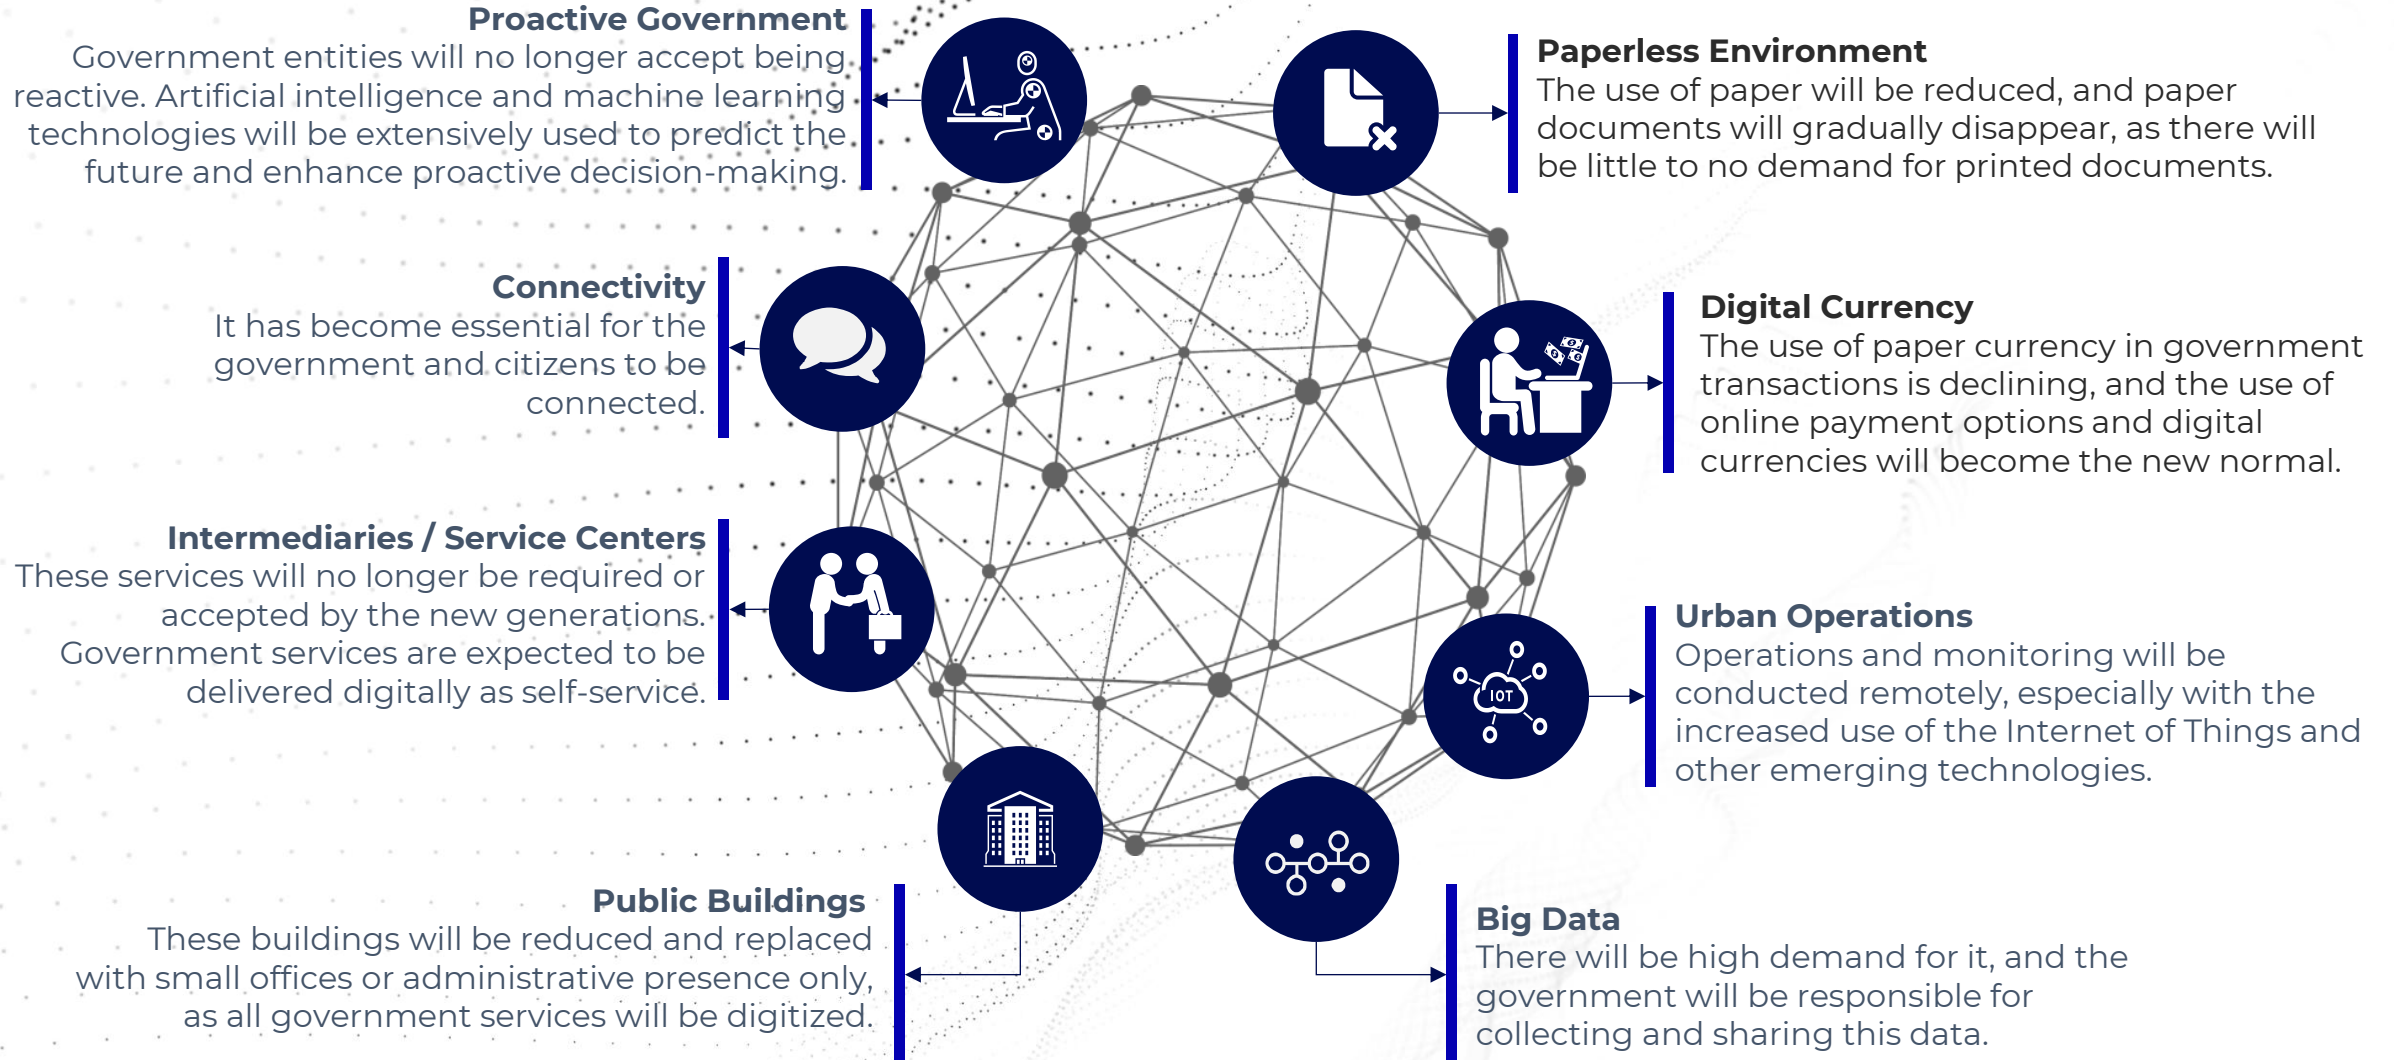

Smart Cities & Infrastructure
Designing intelligent building
and urban systems.

Portfolio

Global Trends

Commitment to National Standards for Digital Transformation.

We have aligned our methodology for implementing digital transformation projects with the national standards for digital transformation. Accordingly, we affirm our full commitment to complying with all policies, frameworks, and standards related to digital transformation issued by the Ministry of Transport, Communications, and Information Technology, as well as other legislative bodies in the Sultanate of Oman.

Our governance model is based on ensuring that all projects, platforms, and services delivered under the agreement:

- Comply with local laws and standards,
- Establish compliance as a fundamental pillar,
- Maintain the highest quality standards in project execution to support the objectives of government digital transformation.

Our Framework for Achieving Excellence in Business Processes and Digital Platforms

The Journey Toward Excellence in Services, Business Processes, Platforms, and Digital Technologies.

Detailed Study of External Services and Internal Procedures.

- 1 Assessment of Current Procedures & Services
- 2 Gap Analysis and Improvement Opportunities
- 3 Designing the To-Be of Procedures and Services

Selection of Digital Systems and Technologies.

- 4 Defining Specifications for Systems & Technologies
- 5 Evaluation of Companies & Proposed Technologies
- 6 Selection of the Implementing Company and Contracting

Digital System Development

- 7 Development of Systems and Digital Technologies
- 8 Technical Support and Maintenance
- 9 Continuous Development and Improvement

- Policy Development
- Policy Assessment
- Corporate Social Responsibility (CSR) Strategy
- Environmental, Social and Governance (ESG) Strategy

Strategic Development and Corporate Social Responsibility (CSR) Advisory

Examples of Previous Projects and Experiences

Prominent Services

- Strategic Planning & Organizational Alignment
- CSR Policy Formulation & Integration
- Stakeholder Engagement & Impact Assessment
- Sustainability & ESG Advisory
- CSR Program Design & Implementation
- Monitoring, Reporting & Communication Strategy

Empanelment of Professional IT & Digital Services – MTCIT

Outcomes Impact

- Delivered comprehensive IT and digital transformation services to multiple government entities, supporting program execution and modernization.
- Developed and deployed digital services using the GUP toolset and integrated with national PKI for secure authentication.
- Executed full-cycle software development, data management, and infrastructure implementation tailored to public sector needs.
- Supported adoption of 4IR technologies, digital communication strategies, and change management across ministries.

Empowerment through Accounting System Implementation - Riyadh

Outcomes Impact

- Installed and configured Tally to align with organizational accounting, inventory, and financial operations.
- Integrated and automated key financial workflows to enhance accuracy and operational efficiency.
- Delivered comprehensive user training and provided ongoing technical support to ensure successful system adoption.

Policy Development

Examples of Previous Projects and Experiences

Prominent Services

- IT Governance Framework Design
- Cybersecurity Policy Development
- Acceptable Use & Access Control Policies
- Disaster Recovery & Business Continuity Planning
- Data Privacy & Compliance Policies
- Policy Review & Continuous Improvement.

Drydock

Marine Consultancy for Tugboat Drydocking - Asyad

Outcomes Impact

- Assess maintenance requirements and prepare a detailed dry-docking scope of work in line with machinery and class guidelines.
- Review tugboat documentation and drawings and prepare tender proposals as per Asyad Ports standards.
- Provide budget estimates for the dry-docking survey.
- Supervise dry-docking activities to ensure compliance with scope, class certification, and flag requirements.

Integrated Safety Management & Training Consultancy - TRA

Outcomes Impact

- Develop and implement safety and security policies, including emergency plans and international standards.
- Conduct ongoing training for employees on occupational health, safety rules, and basic first aid.
- Promote awareness of personal and workplace safety and ensure proper tools and first aid supplies are available.
- Manage security operations, investigate violations, and respond effectively to accidents to minimize harm.

- Performance Monitoring
- Compliance & Standardization
- Continuous Improvement

Sultanate of Oman سلطنة عُمان
وزارة التجارة والصناعة وترويج الاستثمار
Ministry of Commerce, Industry & Investment Promotion

Digital Transformation Consultancy for Directorate General of Standards and Metrology - MOCIIP

Outcomes Impact

- Transformed DGSM eService's with future-state service models.
- Assessed current business processes and technology systems.
- Designed optimized models to improve efficiency and user experience.
- Managed RFP preparation and proposal evaluations.

سلطنة عمان
وزارة التروية الزراعيّة
والسمكيّة وموارد المياه

Comprehensive Digital Transformation and IT Landscape Review – MAFWR

Outcomes Impact

- Led the digital transformation of over 340 eService's across diverse sectors within the Ministry.
- Conducted comprehensive current state assessments covering business processes and technology infrastructure.
- Designed future state models to optimize service delivery and align with strategic objectives.
- Prepared RFPs, facilitated proposal evaluations, and supported vendor selection processes.
- Delivered training programs and managed change initiatives to ensure smooth adoption and stakeholder engagement.

Performance Management

Examples of Previous Projects and Experiences

Prominent Services

- KPI & Metrics Definition
- Performance Monitoring Dashboards
- Strategic Reporting
- Evaluation & Feedback Systems
- Data-Driven Decision Support
- Organizational Alignment

الهيئة العمانية للاعتماد الأكاديمي
و ضمان جودة التعليم
Oman Authority for Academic Accreditation
and Quality Assurance of Education

Development of the Operational Planning System & Treasury Management System - OAAAQA

Outcomes Impact

- Conducted a comprehensive review of the MOHERI Digital Transformation Project Plan in collaboration with senior leadership.
- Delivered strategic input to align project objectives with the Ministry's overarching mission and concurrent initiatives.
- Analyzed system requirements across primary and subsidiary projects to validate technical and operational feasibility.
- Assessed business case documentation to inform prioritization strategies, resource allocation, and executive decision-making.

Digital Transformation Assessment & Project Management Consultancy – North Batinah Governate Office

Outcomes Impact

- Review the digital transformation project plan with the digital transformation executive team and provide feedback and alignment with mission and other projects.
- Subject matter experience and knowledge, and support for the digital transformation team / project management team in addressing the solutions to the challenges.
- Review scope of work for digital transformation projects.
- High level follow up project implementation with the digital transformation team to prepare the requested documents to support the NBGO DT Assessment.

Project Management

Examples of Previous Projects and Experiences

Prominent Services

- PMO Governance & Setup
- Program & Portfolio Management
- Digital Transformation Office (DTO) Establishment
- Risk-Based Milestone Tracking
- Change Management & Communication
- Quality Assurance & Vendor Coordination
- Agile, PRINCE2 & Hybrid Methodologies

Establishing a DTO – MOHERI

Outcomes Impact

- Conduct a comprehensive review of the Ministry's digital transformation plan and ensure alignment with agreed objectives.
- Coordinate with departments to support plan implementation, providing document templates and clear timelines.
- Develop an Excel-based dashboard to monitor progress and track milestones across all departments.
- Identify and escalate any risks that could impact deadlines or compliance with MTCIT assessment requirements.

Project Management for National Suggestions and Complaints Platform – Oman Vision 2040

Outcomes Impact

- Implemented the National Suggestions and Complaints Platform as part of a strategic initiative under Oman Vision 2040.
- Collaborated with the Vision 2040 Implementation Follow-up Unit and ITHCA Group to ensure national alignment.
- Provided comprehensive program management to oversee planning, execution, and stakeholder coordination.
- Delivered quality assurance services to maintain performance standards and ensure platform reliability.

- Business Process Reengineering
- Legacy System Modernization
- Cloud Enablement & Migration
- AI & Smart Automation
- Citizen-Centric Digital Platforms
- Cyber Resilience & Smart Infrastructure

وزارة الثقافة والرياضة والشباب
MINISTRY OF CULTURE, SPORTS AND YOUTH

Operation of the Computer Networks & Central Systems - MCSY

Outcomes Impact

- Strengthened MCSY's IT infrastructure through proactive network monitoring, configuration, and performance optimization.
- Ensured system reliability and security by managing server environments, backups, and routine maintenance.
- Provided rapid technical support and issue resolution to minimize downtime and maintain operational continuity.
- Supported compliance with government IT standards through structured documentation, access control, and system audits.

سلطنة عُمان
وزارة النقل والاتصالات وتقنية المعلومات
Sultanate of Oman
Ministry of Transport, Communications and Information Technology

Digital Transformation Consulting Services - MTCIT

Outcomes Impact

- Reviewed the digital transformation project plan with the executive team to ensure alignment with organizational mission and related initiatives.
- Provided subject matter expertise and advisory support to the digital transformation and project management teams in resolving key challenges.
- Assessed and refined scope of work documents for various digital transformation projects.
- Conducted high-level follow-up on project implementation and supported the preparation of documentation for MTCIT Digital Transformation Assessment.

Digital Transformation Support (1/2)

Examples of Previous projects and Experiences

Prominent Services

- Business Process Reengineering
- Legacy System Modernization
- Cloud Enablement & Migration
- AI & Smart Automation
- Citizen-Centric Digital Platforms
- Cyber Resilience & Smart Infrastructure

الهيئة العمانية للاعتماد الأكاديمي
وضمنان جودة التعليم
Oman Authority for Academic Accreditation
and Quality Assurance of Education

National Qualifications Register & School Review System Enhancement - OAAAQA

Outcomes Impact

- Enhanced the SECA School System by integrating qualification registers, external databases, and help desk support for streamlined academic operations.
- Conducted system evaluations and implemented design improvements to align with educational standards and user requirements.
- Strengthened data security, documentation protocols, and ensured compliance with regulatory and environmental guidelines.
- Delivered training, facilitated cross-functional collaboration, and optimized UX/UI for improved stakeholder engagement and system usability.

وزارة الطاقة والمعادن
Ministry of Energy and Minerals
Sultanate of Oman سلطنة عمان

Maintenance Agreement for Central GIS and Backup Systems - MOEM

Outcomes Impact

- Implemented and optimized GIS systems to support effective capture, visualization, and management of energy and mineral data.
- Integrated diverse datasets to enable real-time geospatial analysis and data-driven decision-making.
- Provided targeted training and ongoing support to build internal capacity and ensure sustainable system utilization.

Mobile App & Web Services

Examples of Previous projects and Experiences

Prominent Services

- Custom Mobile App Development
- Citizen & Customer Portals
- Secure Mobile Architecture
- UX/UI Optimization
- Cross-Platform Solutions
- Integration with Backend Systems

APEX & Mobile App Development Support – Social Protection Fund –SPF

Outcomes Impact

- Delivered responsive and user-friendly mobile and APEX applications tailored to client requirements and operational workflows.
- Ensured seamless integration with backend systems, enhancing data accessibility and real-time functionality.
- Provided ongoing technical support, issue resolution, and performance optimization to maintain application reliability.
- Facilitated user training and documentation to support adoption, usability, and long-term system sustainability.

Technical Web Support Services – Ministry of Justice & Legal Affairs - MOJLA

Outcomes Impact

- Ensured uninterrupted access to MOJLA's website and digital services for all users.
- Maintained website security, verified content accuracy, and executed timely updates.
- Enhanced user experience while ensuring full compliance with government web standards and accessibility guidelines.
- Supported continuous performance monitoring and proactive issue resolution to sustain operational integrity.

E-Services Platform

Examples of Previous projects and Experiences

Prominent Services

- Integrated Service Portals
- Online Payments & Billing
- Secure User Authentication
- Data Analytics & Reporting
- Workflow Automation
- Multi-Channel Accessibility

Providing Learning Management System (MOODLE)

Outcomes Impact

- Deployed and customized Moodle LMS to align with academic and administrative needs, integrating with student systems and authentication platforms.
- Supported digital course setup, including content migration, assessments, and grading structures.
- Delivered training and ongoing technical support to ensure effective adoption, system reliability, and performance.

Development of the Entrepreneurs System & Software Components

Outcomes Impact

- Designed and tested software to meet functional and technical requirements.
- Delivered solutions through requirements analysis, updates, and issue resolution.
- Maintained clear, up-to-date documentation for long-term usability.
- Collaborated across teams and pursued ongoing skill development.

Development of Enhanced Student Scholarship Platform - MOHERI

Outcomes Impact

- Designed and implemented a secure, user-friendly platform to manage scholarship applications, approvals, and disbursements.
- Integrated analytics and reporting tools to enhance transparency, optimize fund allocation, and support data-driven decisions.
- Ensured accessibility and usability for students and administrators through intuitive design, multilingual support, and training.

Technology Stack

Data Management & Artificial Intelligence

Global Solutions LLC

Company Profile

AI STACK

Global Solution's AI technology stack showcases a state-of-the-art integration of advanced tools and platforms, purpose-built to foster innovation and operational excellence. At its core, the stack includes TensorFlow as the foundation for machine learning, alongside NLTK for natural language processing, and containerization technologies such as Docker and Kubernetes (K8s). Together, these components empower Global Solutions to deliver intelligent, data-driven solutions that streamline workflows, support strategic decision-making, and unlock actionable insights across diverse business functions. This strategic adoption of AI reflects Global Solutions unwavering commitment to technological leadership, ensuring its services remain agile, forward-thinking, and responsive to the evolving demands of its clients.

Our Data & AI Service lines

GPT Modelling

With a focus on precision, we excel in crafting specialized AI models through advanced NLP techniques, consistently setting new industry standards.

Big Data

Unleash the power of big data with our precision-engineered solutions, turning bulk raw data into strategic assets for unparalleled growth and excellence.

Business Intelligence

Transforming your data into strategic assets, we engineer customized Business Intelligence solutions that fuel informed decisions and elevate organizational performance.

Data Governance

Through meticulous data governance, we structure and manage data assets, ensuring data quality, compliance, and fostering optimal BI insights for informed decision-making.

Consultancy for Data Management and Analytics Platform Program for Central Bank of Oman

Project Scope:

A comprehensive data management and analytics project that will position CBO to leverage its data assets effectively, drive innovation, and enhance its ability to fulfill its core mandates and support the long-term transformation of CBO into a truly data-driven organization.

Key Business Imperative

- A Platform that provides a single trusted location for all data needs of CBO
- Implementation of Data Management & analytics Platform
- Skilled and qualified people within CBO to use the data from the platform
- Data Cataloging
- AI/ ML
- Live Analytics
- Data Lake/ Warehouse/ Management
- Data Cleansing
- Data Strategy
- DG Framework

Challenges

- Integrating and standardizing data from multiple sources into a single trusted platform.
- Ensuring data quality and cleansing to make information reliable for analytics and decision-making.
- Driving user adoption and building skills within CBO to effectively use the platform.
- Implementing and scaling advanced tools (AI/ML, live analytics, data lake/warehouse) without disrupting operations.
- Establishing strong data governance and strategy to maintain compliance, security, and long-term value.

Global Solutions LLC

Seamless and effective solution aligned with the scope:

- 1. Thorough Assessment and Planning:** Conducted an in-depth audit of existing data assets, infrastructure, and workflows, developing a detailed migration roadmap that minimized operational disruption and aligned with CBO's data-driven vision.
- 2. Robust Data Governance Framework:** Established clear data governance policies and quality controls to ensure data integrity, compliance, and consistency throughout the migration process.
- 3. Advanced Migration Tools and Automation:** Leveraged industry-leading migration tools and automation scripts to enable smooth data transfer, reduce manual effort, and accelerate deployment timelines.
- 4. Zero-Downtime Transition:** Implemented phased migration and parallel run strategies, ensuring uninterrupted operations and seamless continuity of critical business functions.
- 5. Performance Optimization and Testing:** Carried out rigorous validation, performance tuning, and end-to-end testing to ensure the upgraded systems met or exceeded operational and analytics benchmarks.
- 6. User Enablement and Training:** Provided comprehensive knowledge transfer sessions, hands-on training, and documentation, empowering CBO teams to fully leverage the enhanced data platform.
- 7. Post-Migration Support and Monitoring:** Delivered proactive support, fine-tuning, and monitoring post-migration to quickly address issues, ensure system stability, and drive continuous improvement.

GS Capabilities

- Strong expertise in large-scale data integration and migration projects.
- In-depth knowledge of Informatica tools and technologies.
- Proven ability to manage complex interdependencies and database integrations.

Results/Benefits

- Stronger Decision-Making: Empowered CBO with timely, accurate insights to drive data-driven strategies and innovation.
- Improved Data Quality & Compliance: Ensured integrity, consistency, and adherence to regulatory standards across all data assets.
- Operational Efficiency: Streamlined processes and automated workflows, reducing manual effort and enhancing productivity.
- Scalable, Future-Ready Infrastructure: Positioned CBO to handle growing data demands and support advanced analytics initiatives.
- Business Continuity & Confidence: Achieved seamless migration with minimal disruption, maintaining trust and uninterrupted services.

Artificial Intelligence Strategy & Enablement Consultancy for Oman Chamber of Commerce & Industry

Project Scope:

Global Solutions LLC was engaged by the Oman Chamber of Commerce & Industry (OCCI) to lead an AI-focused consultancy aimed at enhancing operational intelligence and data-driven decision-making. The project involved assessing OCCI's digital maturity, crafting a tailored AI strategy and roadmap, recommending suitable technologies, and developing predictive dashboards. To support executive alignment, structured feedback channels and communication loops were also established.

غرفة تجارة وصناعة عُمان

OMAN CHAMBER OF
COMMERCE & INDUSTRY

Key Business Imperative

- Establish OCCI as a digitally empowered institution driving innovation and operational excellence.
- Leverage AI to enhance service delivery, responsiveness, and member engagement.
- Enable data-driven policy formulation aligned with national development goals.
- Support private sector growth through intelligent insights and predictive analytics.
- Align institutional transformation with the strategic pillars of Oman Vision 2040

Key Challenges

- Fragmented data sources across commercial and industrial sectors.
- Limited real-time insights for decision-makers.
- Absence of a unified AI strategy and roadmap.
- Need for scalable, secure, and context-aware AI tools.
- Low automation in feedback and performance tracking mechanisms.

Global Solutions LLC

To address OCCI's strategic priorities and digital transformation goals, Global Solutions LLC delivered a suite of targeted AI solutions designed for measurable impact. Each component was tailored to enhance institutional intelligence, streamline decision-making, and foster deeper stakeholder engagement. The following key deliverables formed the backbone of the consultancy:

- 1. AI Strategy & Roadmap:** Developed a tailored AI strategy aligned with OCCI's governance model and future aspirations.
- 2. Use Case Identification:** Mapped high-impact AI use cases across financial forecasting, sector performance, and customer satisfaction.
- 3. Data Integration & Visualization:** Designed GIS-enabled dashboards integrating commercial and industrial datasets for intuitive analysis.
- 4. Predictive Analytics Engine:** Implemented machine learning models for trend forecasting, gap analysis, and sector benchmarking.
- 5. Feedback & Engagement System:** Built interactive channels for stakeholder feedback, sentiment analysis, and service refinement

GS Capabilities

- Proven expertise in digital transformation across government and SME sectors.
- Advanced capabilities in AI, machine learning, and data engineering.
- Experience in designing national platforms and eService's for over 340 services.
- ISO-certified processes and methodologies ensuring quality and security.
- Strategic partnerships with global AI experts and technology providers

Results/Benefits

- A clear, actionable AI roadmap tailored to OCCI's strategic goals.
- Enhanced data visibility and real-time decision support for leadership.
- Improved stakeholder engagement through automated feedback systems.
- Strengthened institutional capacity in AI adoption and governance.
- Positioned OCCI as a regional leader in AI-driven commerce and industry enablement

AI Utilization Awareness and Skill Development Workshops Ministry of Information

Project Scope:

Conduct tailored AI awareness sessions to introduce fundamental concepts, current trends, and relevant use cases for the organization. Organize interactive skill-development workshops with hands-on demonstrations of AI tools, platforms, and frameworks. Map AI use cases to organizational functions, showing how AI can drive efficiency, innovation, and decision-making. Develop and provide learning materials (presentations, guides, recorded sessions) for ongoing internal reference. Engage cross-functional teams (business, IT, operations) to ensure alignment and shared understanding. Collect feedback and recommend next steps for pilot projects or further AI initiatives within the organization.

Key Business Imperative

- Accelerate organizational AI readiness by creating a knowledgeable workforce prepared for AI integration.
- Align AI initiatives with strategic goals to ensure tangible business value and improved service delivery.
- Build internal capabilities so teams can identify and implement relevant AI solutions independently.
- Foster innovation and competitiveness by leveraging AI in processes, analytics, and customer engagement.
- Establish governance and ethical practices to guide responsible AI adoption across the organization.

Key Challenges

- Diverse knowledge levels among participants may make it difficult to deliver content that resonates with everyone.
- Identifying meaningful AI use cases that directly support organizational priorities.
- Resistance to change from staff or management when adopting new AI-driven approaches.
- Time and resource constraints limiting participation or follow-through after workshops.
- Translating awareness into action, ensuring workshop outcomes lead to real implementation steps.

Global Solutions LLC

Delivering a comprehensive AI enablement program that raises organizational awareness, builds practical skills through hands-on workshops, and maps AI use cases to key business functions.

- 1. AI Knowledge Enablement:** Ability to design and deliver tailored AI awareness sessions that introduce core concepts, emerging trends, and practical use cases relevant to the organization.
- 2. Hands-On Skill Development:** Proven expertise in conducting interactive workshops with live demonstrations of AI tools, platforms, and frameworks to build practical skills.
- 3. Use-Case Mapping & Integration:** Capability to analyze business functions and map AI applications that drive operational efficiency, innovation, and data-driven decision-making.
- 4. Content Development & Knowledge Transfer:** Strength in creating comprehensive learning materials—presentations, guides, and recorded sessions—for ongoing organizational reference.
- 5. Cross-Functional Engagement & Road-Mapping:** Skilled in engaging diverse teams, gathering feedback, and recommending actionable next steps for AI pilot projects and future initiatives.

GS Capabilities

- Customized Learning Design: Ability to curate AI awareness programs tailored to the organization's industry, maturity level, and strategic priorities.
- Cross-Functional Collaboration: Skilled at engaging business, IT, and operational teams to ensure shared understanding and unified adoption of AI initiatives.
- Practical Implementation Focus: Experience in linking AI concepts to real organizational workflows, highlighting tangible efficiency and innovation gains.
- Continuous Enablement: Capability to provide ongoing support through reference materials, feedback loops, and guidance for future AI rollouts and pilots.

Results/Benefits

- Increased AI Awareness: Staff gain a solid understanding of AI fundamentals, reducing fear and resistance to adoption.
- Enhanced Skills and Confidence: Hands-on workshops equip teams with practical AI skills, enabling effective use of AI tools in daily operations.
- Improved Operational Efficiency: AI use cases mapped to business functions lead to streamlined processes and better decision-making.
- Stronger Cross-Department Collaboration: Unified understanding of AI fosters teamwork and alignment across business, IT, and operations.
- Clear Pathway for Innovation: Actionable recommendations and pilot project plans provide a roadmap for sustainable AI-driven growth.

Smart Building Architecture Blueprint: Building an Overall Digital Solution Based on Digital Platforms

Energy Management

Transforming Consumption into Strategic Advantage

Water Consumption Analysis

Optimize water usage through intelligent tracking and predictive insights to support sustainability goals and reduce utility overhead.

Electricity Consumption Analysis

Gain granular visibility into power usage patterns to identify inefficiencies, forecast demand, and drive cost-effective energy strategies

AC Control

Implement adaptive climate control that responds to usage trends and external conditions, ensuring optimal comfort and energy savings.

Lighting Control

Automate lighting based on occupancy and ambient conditions to enhance comfort, reduce energy waste, and support smart building operations.

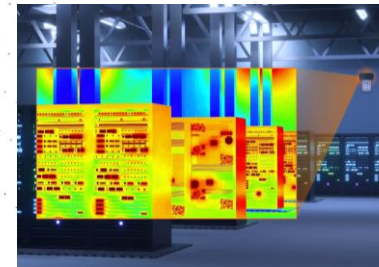

Display Device Control

Centralize control of visual systems to streamline meeting room readiness, reduce idle power draw, and improve operational efficiency

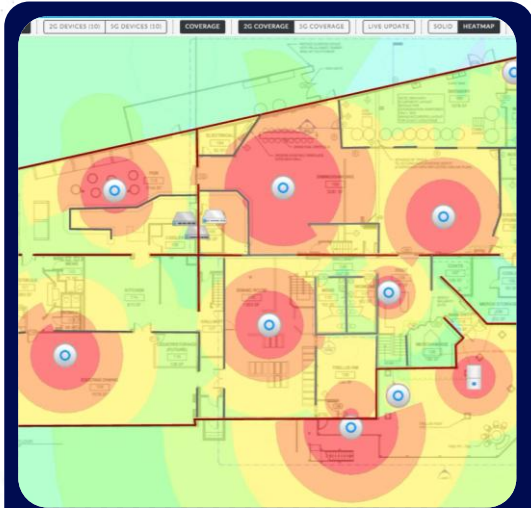

DC Temperature Monitoring

Monitor thermal conditions in real time to protect critical infrastructure, optimize cooling systems, and extend equipment lifespan.

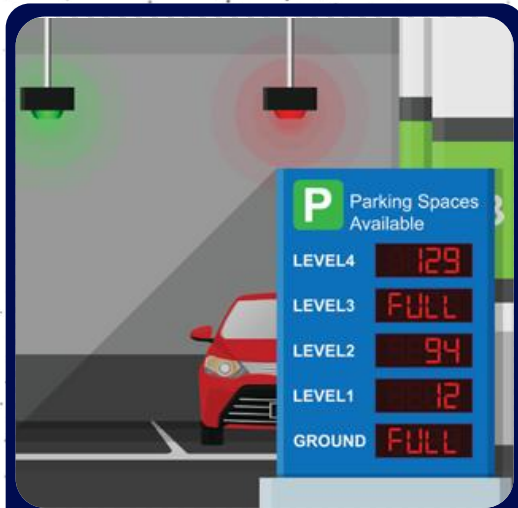

Space Management

Monitor ambient conditions using smart sensors to maintain optimal comfort, prevent equipment stress, and support energy-efficient climate control

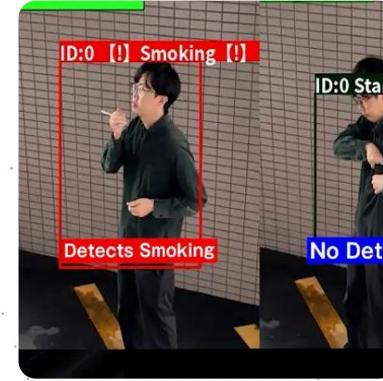

Air Quality

Track indoor air pollutants and ventilation levels to ensure healthy environments, and improve occupant well-being

Water Leak

Detect leaks in real time to prevent damage, reduce water waste, and support proactive maintenance across facilities.

Smoking Detection

Identify smoking activity through intelligent vision systems to enforce safety policies, reduce fire risks, and maintain air quality.

Trash Overflowing

Monitor waste levels with smart sensors to optimize collection schedules, reduce public health risks, and enhance urban cleanliness.

Access Management

Next-Gen Access Control for Connected Environments

Visitor Management

Paperless Efficient

- Self-registration Kiosk
- QR Code Registration
- Biometric Credential for quick access

Elevator Management

Energy Saving

- Elevator control and access system integration with Destination Oriented Allocation System (DOAS)

Attendance Management

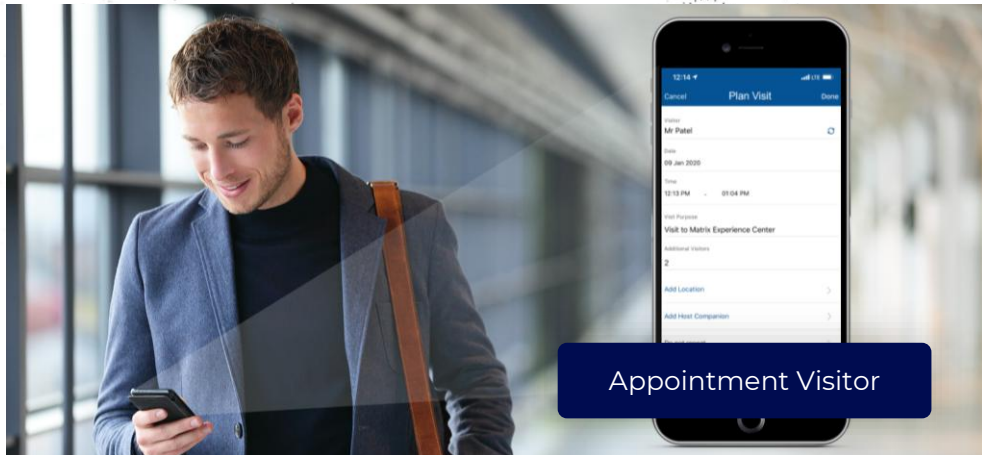

Value Added

- Access records as attendance
- Great Openness by API / DB / AD

Visitor Management

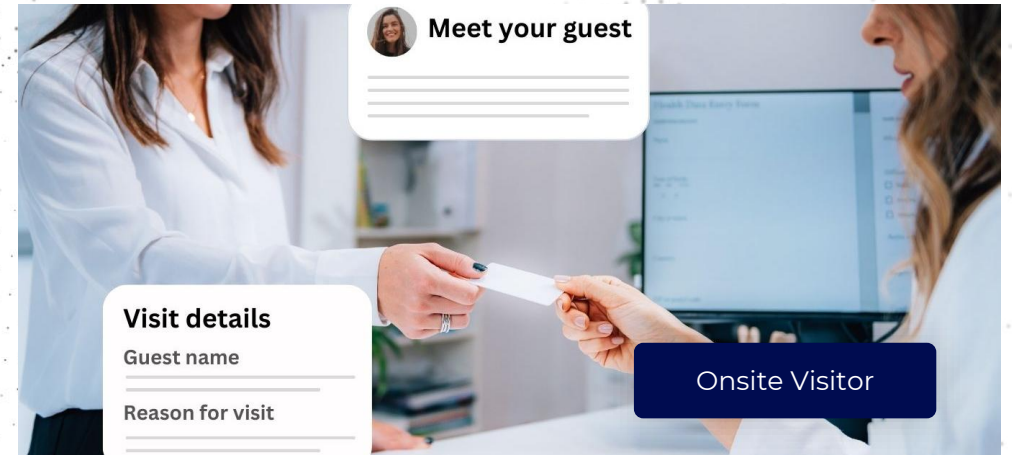

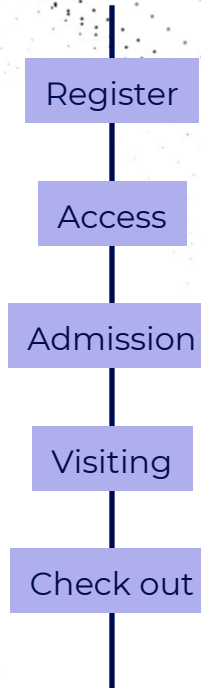

Enhancing Security and Experience Through Smart Visitor Journeys

Invite your Visitor Everywhere

Seamless Scheduling, Anywhere Access

- Empower hosts to invite visitors remotely using secure digital credentials
- Visitors receive appointment details, access permissions, and location guidance through a unified mobile interface

Professional Visitor Process Brings trust and safe

Structured Entry, Trusted Engagement

- Ensure a smooth and secure check-in experience through real-time verification, visit tracking, and purpose-based access.
- Build trust by delivering transparent processes and efficient visitor handling across all touchpoints

GLOBAL
SOLUTIONS L.L.C.

AI Driven Customer Support

AI Hologram Key Features

Natural Interaction

Personalized responses with real-time conversational AI

High Visual Quality

Crisp, detailed holographic display for lifelike experiences

Adjustable Content

Easily configurable to suit various environments and applications

Anti-Glare Glass

Ensures clear visibility under different lighting conditions

Life-Size & Realistic Projection

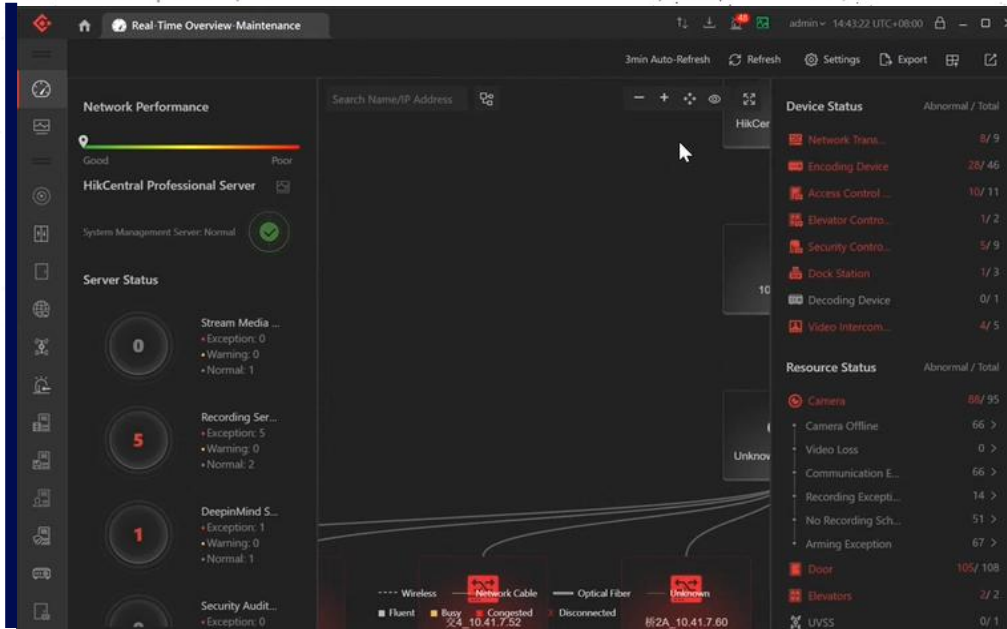

Human-scale visuals for immersive engagement

20-Point IR Touch

Advanced multi-touch interactivity for enhanced user control

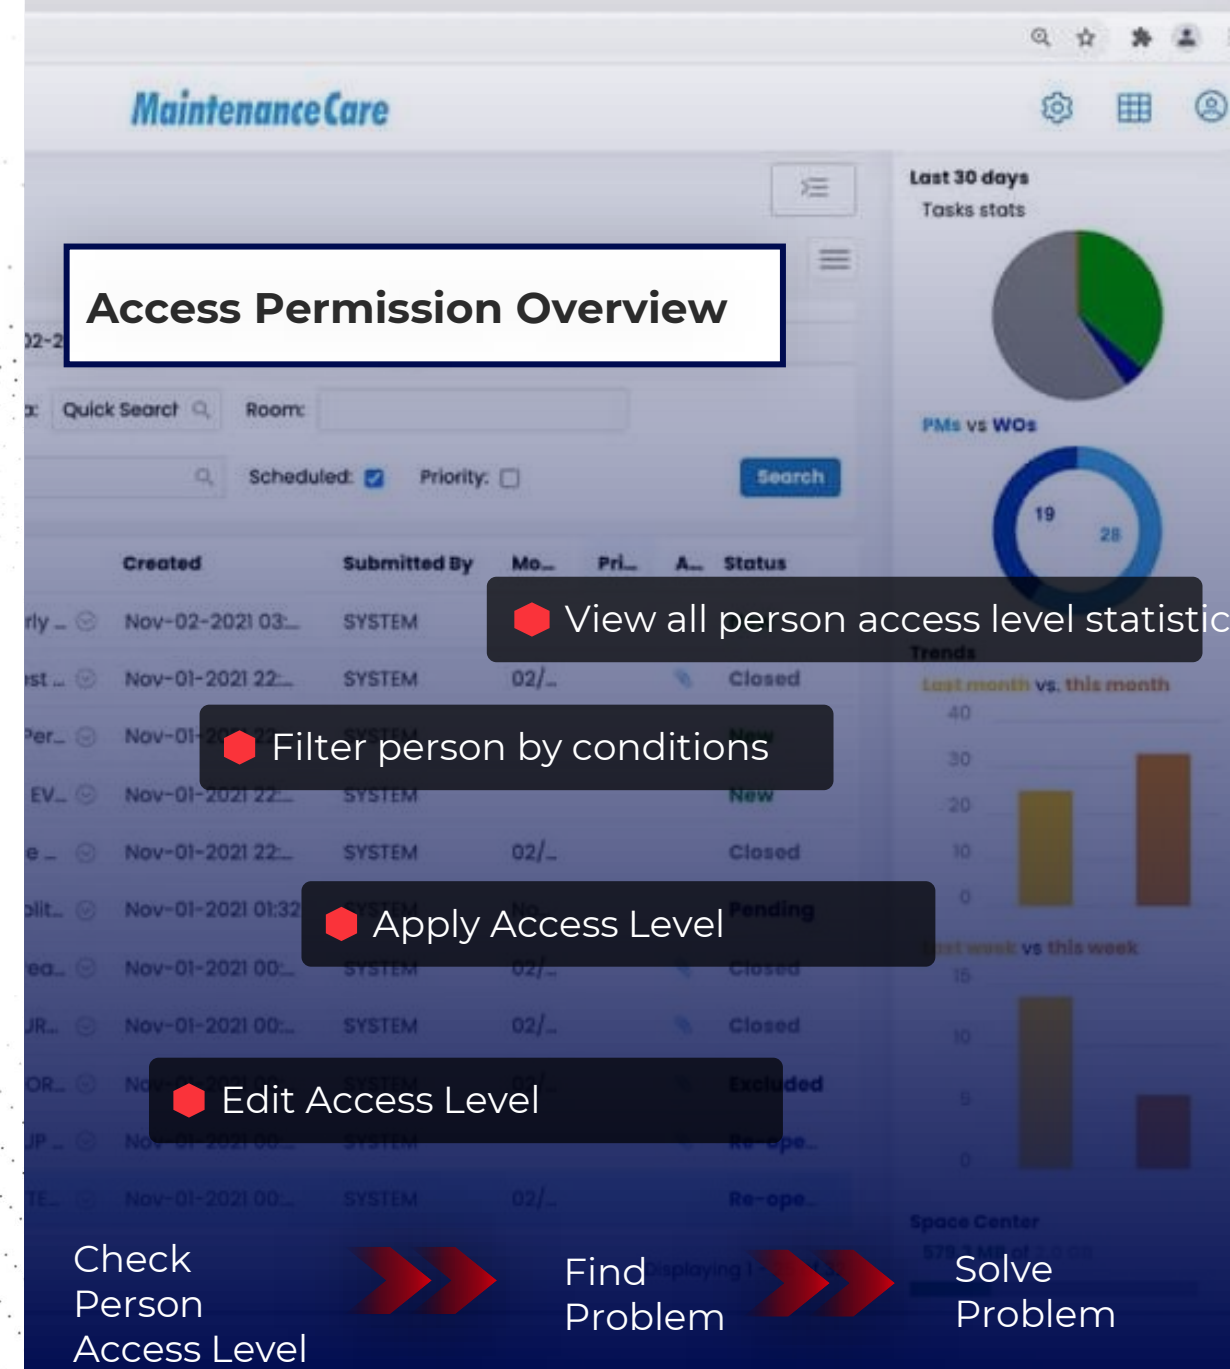

Maintenance Management

System Health Status overview

- Visualized display smart managed switches topology
- Intuitively demonstrate network deployment and each network nodes status
- Quickly check detail information, IP address, network status, RAM, CPU, RJ45 ports, etc.

Access Permission Overview

Asset Management

Tailored Tracking for High-Value and General Assets

High Value Assets

Asset characteristics

- High Asset Value
- High safety Requirements
- Real-Time Status Monitoring

Based on the SENSE active RFID valuable asset management

- Location monitoring
- Condition monitoring
- Regional alarm
- Online inventory

Assets in General

Asset characteristics

- The quantity is huge
- Real-time requirement of asset location is not high
- The inventory workload is large

General asset management based on SENSE passive RFID

- Gangway
- Handheld inventory

Secure Communications and Intelligent Mobility

Network Operation & Control Centers (NOC)

Centralized facilities for real-time monitoring, management, and optimization of network performance. Ensure high availability, rapid incident response, and streamlined service delivery

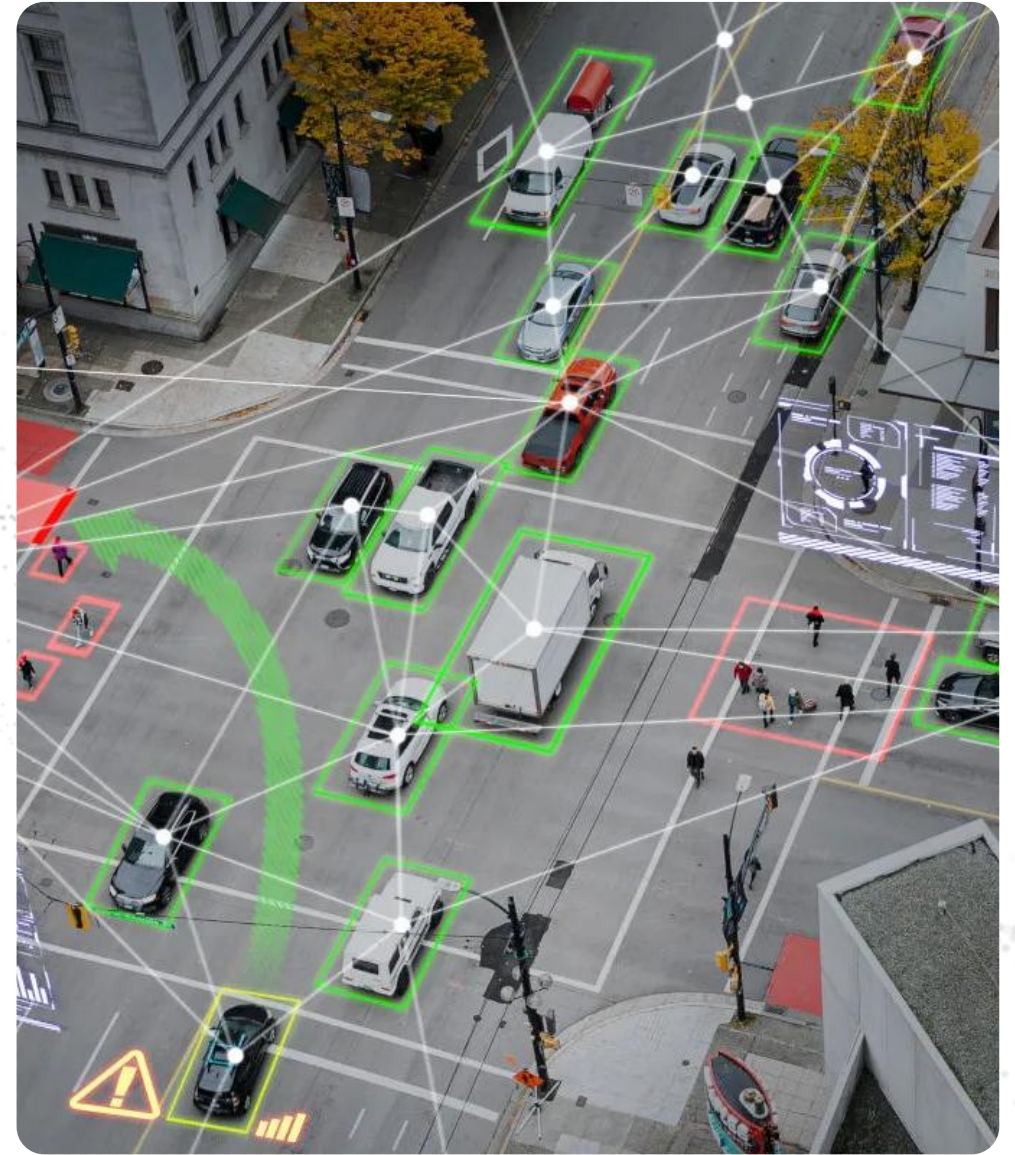

Microwave & Backhaul Solutions

Reliable wireless transmission systems ensuring seamless connectivity across long distances. Ideal for bridging network gaps in remote areas and supporting mission-critical communications.

Intelligent Transportation System

- Detects vehicles moving without a license plate.
- Identifies vehicles driving in the wrong direction.
- Monitors unauthorized lane switching.
- Detects illegal use of emergency lanes.
- Identifies vehicles involved in illegal parking.
- Counts vehicle flow and monitors traffic congestion.
- Classifies vehicle types (cars, trucks, buses, etc.).
- Detects traffic light violations.
- Pedestrian-on-crossing detection to optimize traffic signal timing.
- Recognizes emergency vehicles to reduce response times and enhance intersection safety.
- Integrates city CCTV systems with the ITS platform for comprehensive traffic monitoring and control

Ev Charging Stations

- Intelligent Charging Solutions
- One Stop PV- ESS- EVSE and EMS Solution.

Innovating Reliable Connectivity and Communication Solutions

Mission-Critical Radio Communication Systems

Reliable and secure radio solutions designed to ensure uninterrupted communication in high-risk and essential operations. Engineered for defense, public safety, and industrial sectors where every second counts.

FTTx and Broadband Infrastructure

High-speed fiber optic solutions enabling robust, scalable, and future-ready internet connectivity. Designed to support smart cities, businesses, and residential networks with reliable broadband access.

Satellite & Long-Range Connectivity

Enables communication in remote and underserved areas through reliable satellite links. Supports mission-critical operations with extended coverage and seamless connectivity.

GSOMAN | COMPANY PROFILE

Experience & Capabilities

Projects Experience (1/3)

Proven Track Record of Excellence

Implementation of Data Center for Ministry of Culture, Sports and Youth

- Passive, Active network & Storage
- MEPs, Raised floor, Cooling, & UPS.
- 2012

Overall coverage Video Surveillance system for Oman Methanol Company

- 120+ IP CCTV camera
- 8 Years L1, L2 Support .
- 2018

OSP backbone connection for Oman Broadband

- 2500+ connection
- 5 professional Teams
- 2015 - 18

Video Surveillance system for Saud Bahwan Group Showrooms

- 1000+ CCTV Camera
- 20+ Branch Across Oman
- 2025

Installation of Explosion Prof CCTV system for Oil & Gas locations for Abraj Energy

- 20 Explosion Prof Camera
- V-sat Connectivity for Remote monitoring
- 2020

Video Surveillance for 20 Oman Post Branches entire Oman

- 300+ CCTV camera
- 20 Location
- 2015

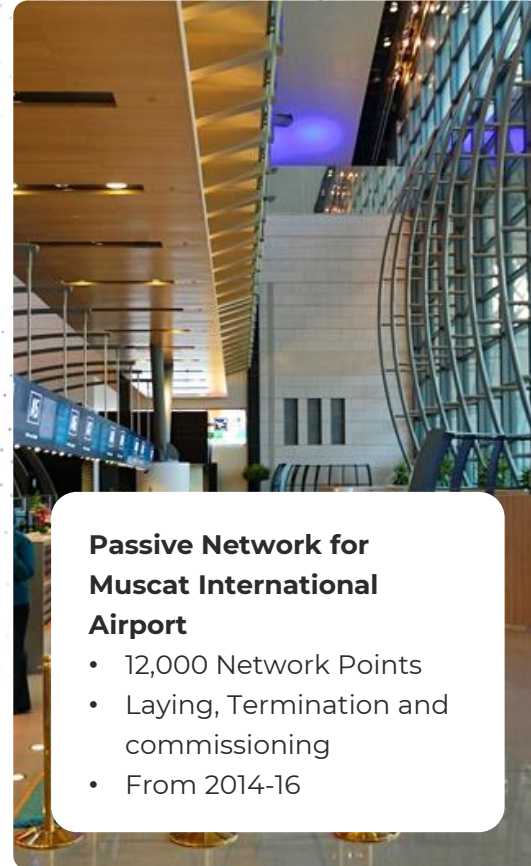

Projects Experience (2/3)

Examples of IT Infrastructure Projects

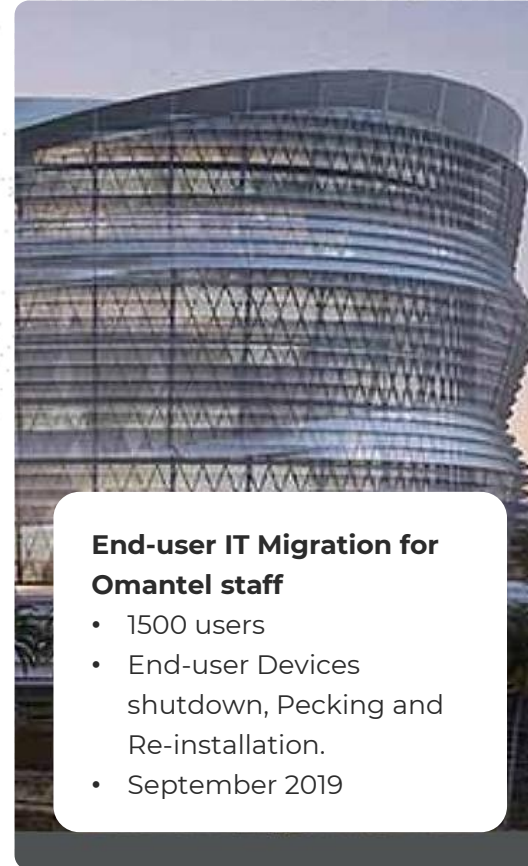

Network Infrastructure for Oman Council Building

- Passive Network Installation.
- 15,000+ User, Access Control, Video Surveillance AV & Pa system cabling.
- 2013-15

Passive Network for Muscat International Airport

- 12,000 Network Points
- Laying, Termination and commissioning
- From 2014-16

End-user IT Migration for Omantel staff

- 1500 users
- End-user Devices shutdown, Pecking and Re-installation.
- September 2019

IT Infrastructure Technical Support

- Network, Information Security and Systems
- L1, & L2 support
- 2025 - 2028

Projects Experience (3/3)

Annual Maintenance Contract for 236 Fuel Station

Providing comprehensive AMC services for a large-scale video surveillance system comprising over 5,000 cameras across 236 locations throughout Oman, ensuring optimal performance, security, and uptime across all sites.

Video Surveillance system for 59 Branch

Comprehensive CCTV coverage across NEDC's network, with 700+ IP cameras and centralized control at HQ.

Supply and Installation of Structure cabling system for Majan & Al Kamel Police Stations.

Successfully installed and commissioned over 2,000 passive network cabling points and components, ensuring robust connectivity across designated facilities.

Fiber Uplink for SQU Buildings

Currently laying 50 KM of FOC interconnectivity between SQU buildings, including 1200-core splicing, OTDR testing, and area layout design to enable high-speed campus-wide connectivity.

Khazzan BP Block 61 FOC connectivity for Telecom and Pipeline monitoring

Supply of professionals for the telecom and surveillance passive connectivity within the Block area.

Supply & Installation of Micro Datacenters to UTAs Musanah & Sohar

Deploying a microdata center with active components and over 3,000 passive network elements, ensuring scalable, high-performance connectivity across the infrastructure.

GSOMAN | COMPANY PROFILE

A large, abstract graphic consisting of a series of horizontal, wavy lines of small, glowing blue dots. The dots are arranged in a grid that follows the curves of the waves, creating a sense of depth and movement. The color transitions from a deep blue on the left to a lighter, cyan-like blue on the right.

Why Global Solutions?

We distinguish ourselves through a robust track record built on decades of expertise from our professionals.

Strong Experience

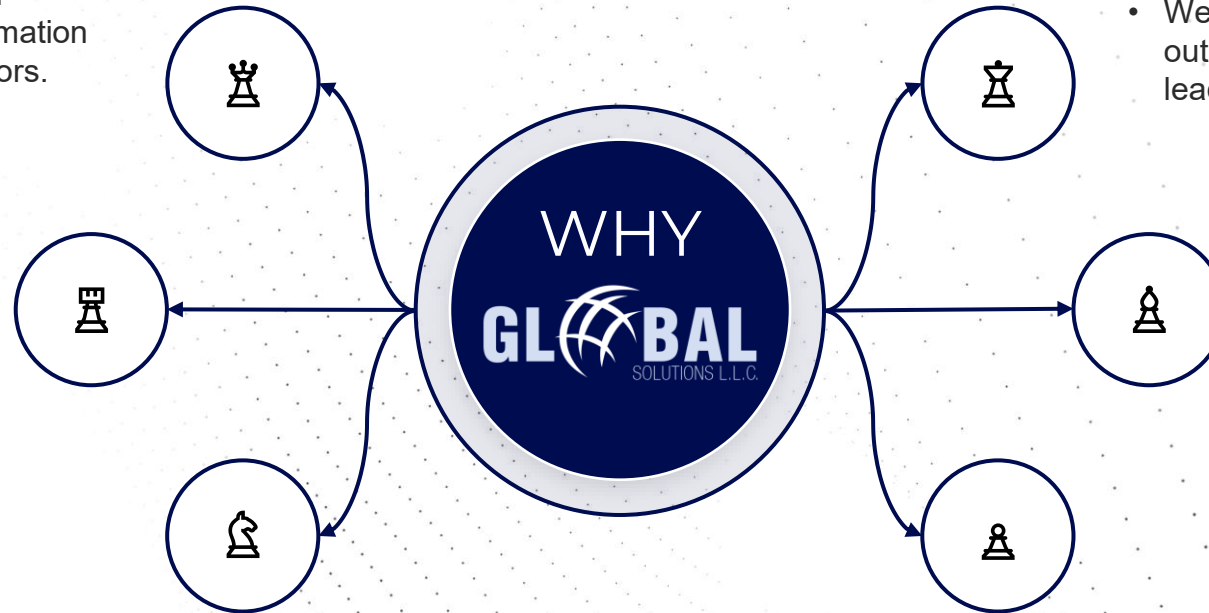

An elite team of seasoned experts with proven success and deep technical expertise in service center transformation across both public and private sectors.

Deep Ecosystem Understanding

- Mastering local regulations
- Hands-on experience in government entities, Oman's biggest banks, gov/international organizations, and Omans-based multinationals
- On-ground team
- Native Arabic speakers

Knowledge Transferee

We drive lasting impact by sharing our experts' deep experience through a structured knowledge transfer program that embeds tacit know-how within client teams.

Comprehensive approach

- Functional groupings to ensure each functions thoroughly addressed.
- We believe this methodology shall deliver outcomes that, when implemented, shall lead to sustainable change.

Implementable Interventions

We craft practical solutions rooted in a unified vision to drive sustainable growth, profitability, and lasting improvement by aligning organizational assets and inspiring internal transformation.

Delivery Excellence

GS's proven methodology guarantees project delivery excellence through:

- Smart Planning
- Project Governance
- Scope Control
- Stakeholder Management
- Open Communication
- Risk Management

Standardized Certificates

National & Globally Recognized Certifications Ensuring Quality, Security, and Compliance

ISO 27001

An international standard that outlines best practices for establishing, implementing, maintaining, and continuously improving an Information Security Management System (ISMS) to protect sensitive data.

Riyada Certifies

The Riyada Card is an initiative by the Small and Medium Enterprises Development Authority (SME Authority) in Oman, designed to support and empower entrepreneurs across the Sultanate.

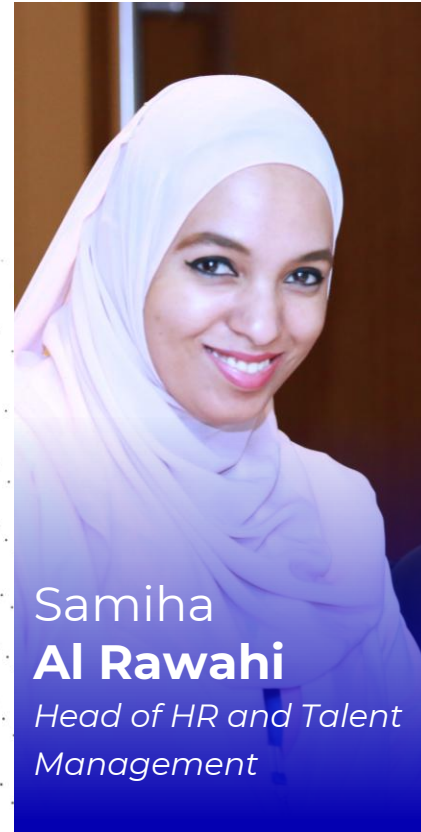

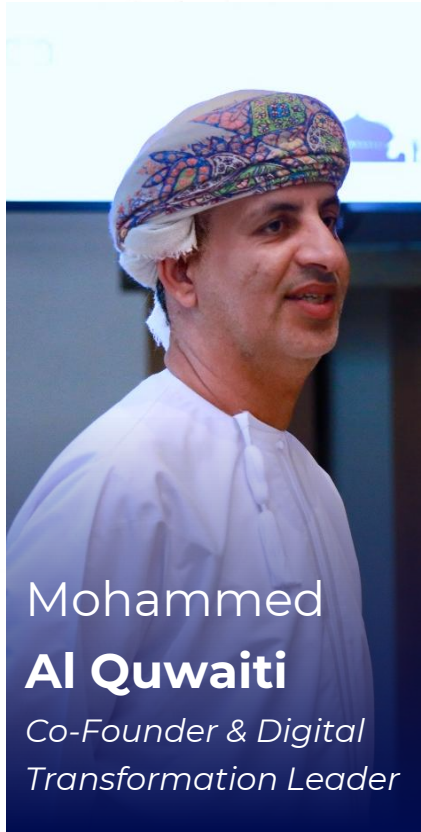

JSRS Certified

The **JSRS Certificate** in Oman refers to the **Joint Supplier Registration System**, a centralized certification and registration platform managed by **Business Gateways International** on behalf of the **Ministry of Energy and Minerals**.

Meet Our Team

Strategic thinkers and creative specialists delivering impactful, brand-driven solutions.

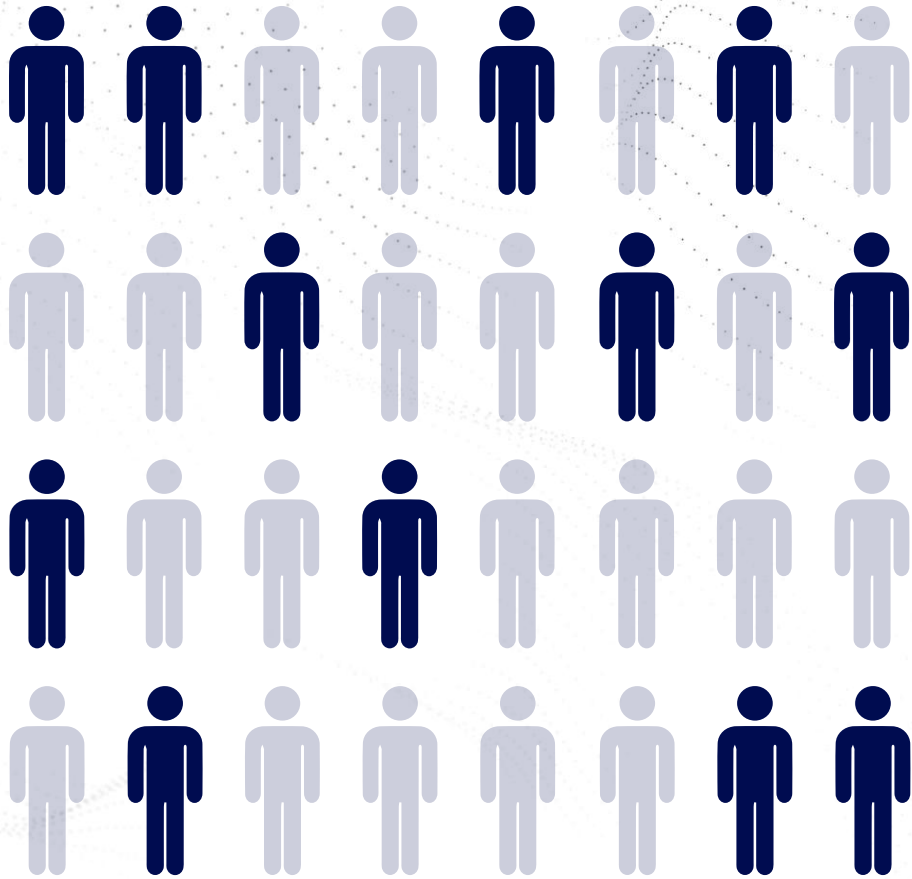

Our Team

A passionate crew of creatives who turn imagination into innovation together

Omanization

Committed to supporting national initiatives and programs aimed at employment nationalization.

>30%
Omanization

Our company is fully committed to supporting national initiatives and programs aimed at employment nationalization. We actively align our recruitment, training, and development strategies with government-led efforts to empower and integrate local talent into the workforce.

By prioritizing the hiring and upskilling of national professionals, we contribute to building a sustainable and self-reliant economy while fostering long-term growth and social development. This alignment reflects our dedication to national priorities and our role as a responsible and forward-thinking employer.

Our Values

Transparency

We prioritize open communication to build trust and foster collaboration within our team and with clients.

Integrity

Operating with unwavering honesty, we uphold the highest ethical standards to maintain trust with clients and partners.

Impact

Our focus is on delivering solutions that create a positive and lasting impact in the lives of clients and community.

Creativity

We embrace and encourage creative thinking, recognize that innovation is key to overcoming challenges.

Pursuit of Excellence

Committed to continuous improvement, we set high standards to deliver exceptional quality, consistently exceeding expectations.

Global Solutions CSR Strategy

Our Commitment to a Digitally Advanced and Sustainable Future

Smart Governance & Infrastructure

Enhancing public services and urban development.

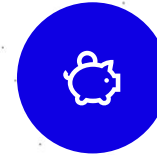

Innovation & Skill Development

Fostering innovation and Omani talent development.

Sustainable & Resilient Future

Building a technologically advanced and eco-conscious nation:

Digital Economy Growth

Driving economic diversification through technology.

Global Competitiveness

Empowering Omani entities to thrive globally.
